

INDIVIDUAL PACKAGING SOLUTIONS  
STRONG RESISTANT IN EVERY MOMENT:  
INTELLIGENCE AND INNOVATION  
MADE IN GERMANY  
AND, OF COURSE, FROM

**Flexipack**

International

Intelligent packaging systems

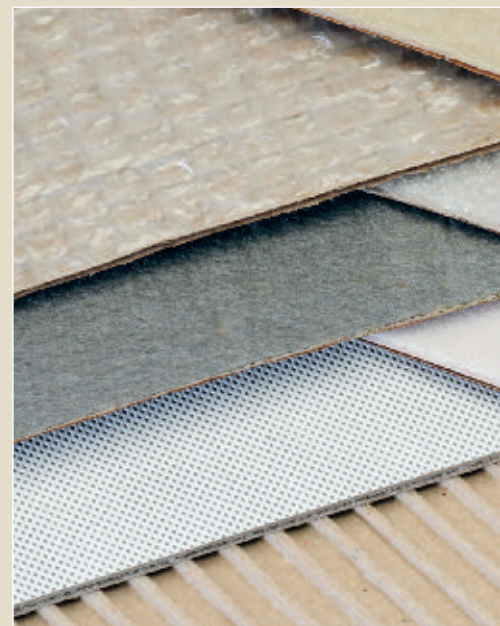

## UNIQUE FLEXIPACK – THE CAST PADDED CARDBOARD

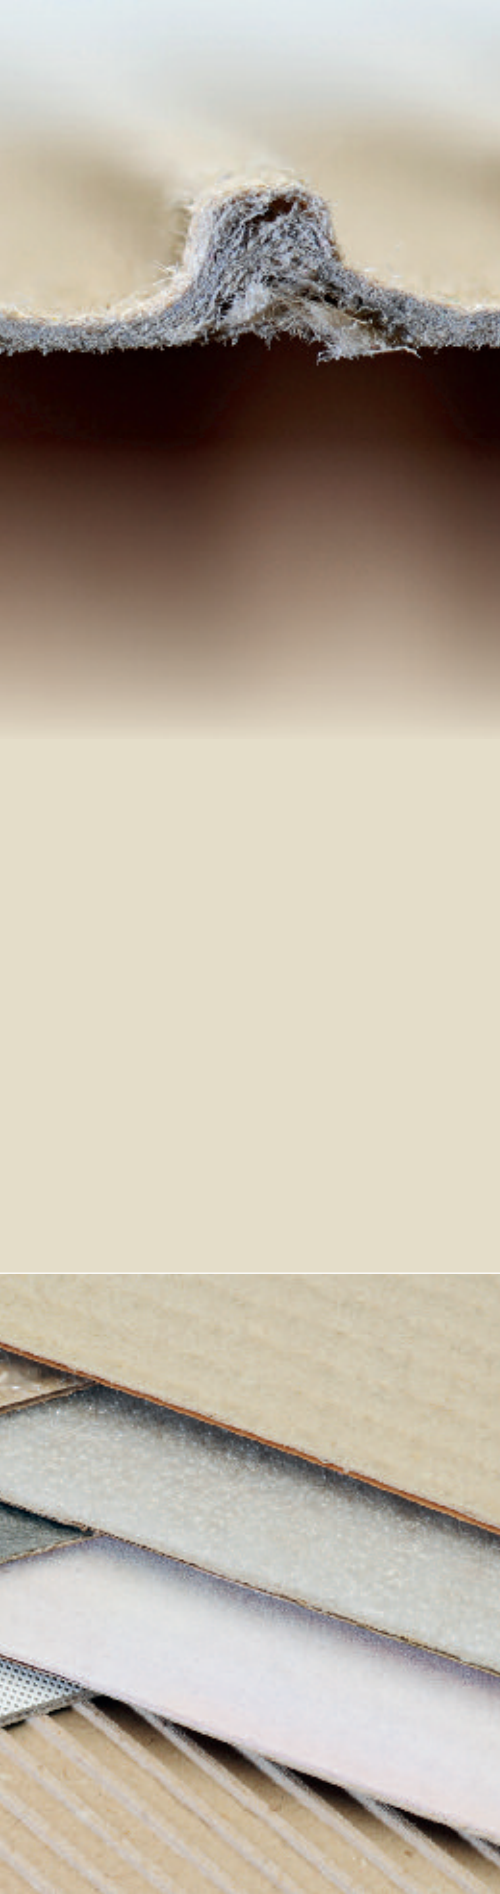

- Prized ecologically
- Made 100% from scrap paper – completely recyclable
- Dimensionally stable and flexible
- Pressure-resistant and extremely cushioning
- Protective and absorbing
- Can be individually equipped as scroll, cut-out and ready-finished
- Unique compared to other packaging materials
- Where packaging materials nearly reach their limits flexipack begins.
- Furniture quality campaign – Flexipack slashes to end complaint rates

Flexipack laminates using very many different papers

Flexipack Multimaterial fitted out possibly with PE, PU foam over bubble wrap, PP fleece or gore tex fabric and keeping in mind the relevant customer requirements

# ENTHUSIASM MADE BY “FLEXIPACK”

Only one thing is good enough for our customers:

**The best.**

“Flexipack International” is certificated on the basis of DIN EN ISO 9001 and also complies with RESY requirements.

“Made by Flexipack” is looked on in the professional world as a special trade mark seal of approval:

- For innovative products providing decisive impulses in packing technology progress
- For exemplary functionality and safety protection
- For highest possible economic efficiency and effectiveness
- And last but not least for rapid, competent service where each and every customer finds his/her personal contact just around the corner.

We want enthusiasm to emerge from the work we undertake with you!

# FLEXIPACK

## AUTOMOTIV

Stabilizing the component parts with Flexipack Flatpads. The Flatpad cut-outs ensure optimum parts protection

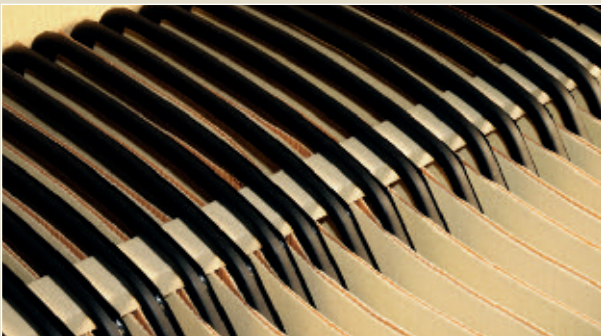

Our high degree of finishing ensures maximum piercing requirements one can meet

For packaging highly gloss-coated metal and plastic parts – inner PU foam Flexipack tube

Efficient stacking of the most delicate of parts possible thanks to Flatpad's flexibility

Structured packaging solutions for the CKD field shown here for door frame trims

Flexipack Flatpad for optimum protection of metal and plastic parts - whether untreated or coated

## “FLATPAD”

# ABSORBS IMPACTS AND COSTS

Permanently flexible, impact-absorbing, pressure off-setting – “Flatpad” provides “Flexipack International” with an unbeatable packaging system for the automobile industry. This supple product can be used as an interlayer in all applications. Horizontal and vertical protection are ensured. “Flatpad” is also ideally suited for lining grid storage boxes and bin systems. Its unique flexibility ensures they are optimally used. Using “Flatpad” effectively cuts costs.

## BRILLIANT PACKAGING IDEAS FOR GLOSS PRODUCTS

Our specialists pull out all the stops when CKD - “Completely Knocked Down” – vehicles are sent on their way. No challenge is big enough. Their particular strength lies in developing complex and structured packaging systems. For instance, for cushioning surface protection of final-coated high gloss components. At all events, “Flexipack International” comes up with individual solutions – whether in design, acquisition or processing. At the same time, in fact, as our customers develop their products. Always innovative, dependable and economic – just as brilliant packaging ideas should be.

Together with Flexipack absorbing properties, the ribbed structure ensures optimum fixing for optimum capacity utilization of returnable bins

FLEXIPACK

FURNITURE QUALITY  
CAMPAIGN

Flexipack edge protectors come up with the best possible grades in protecting high-end products

For enhancing quality properties combined with multimaterials for the best possible protection

Flexipack's diversity in applications ensures optimum protection for the entire product

## “FLEXIPACK” – PARTNER FOR THE “FURNITURE INDUSTRY” QUALITY CAMPAIGN

Whether exclusive living rooms or high-end office chairs – “Flexipack International” is ideally furnished and equipped to deal with the furniture industry's particular requirements. Our structured packaging provides effective protection and a maximum of safety in storing, stacking and handling furniture. Tested in practice under realistic conditions. Oriented to the accredited testing systems of the furniture industry, with which we are linked by a joint quality campaign. After all, only those constantly improving matters stay up with the leaders.

### **Lesser the complaints, greater the profit**

Furniture also has its delicate side. “Flexipack International” packaging systems see to it that multimaterial products retain their gleam. Scrapes and scratches have no chance thanks to the protective pad. Complaint numbers drop and market sales surge!

The many different finishing possibilities ensure 100% protection of those delicate surfaces

The use of multimaterials, e.g. for strengthening particularly impact-affected transport protection edges, ensures ideal product protection

Even the smallest of additional inner packaging details lead to the desired result

It is the flexibility which ensures wrap-round protection of linear edges, faces and corners

A twin surface/installation protector in conjunction with an optimum edge protector brings about maximum logistics efficiencies one can reach

## INDIVIDUAL PACKAGING SOLUTIONS FOR HIGH-END SANITARY PRODUCTS AND RADIATORS

Total packaging solutions from a single source – one of the key features of our corporate philosophy. To this end, we develop both major order full mechanical/automatic applications and individual concepts for mini-volume production runs. Many industries – including the radiator business – are warming to the recommendation to use “Flexipack International” individual packaging modules.

### Clean-cut packaging solutions for the sanitary field

Clean-cut solutions are demanded of products in the sanitary field. With its refreshing ideas “Flexipack International” ensures multilayered, diverse, on-the-spot optimum protection for ceramic fittings, taps, bath tubs and showers.

FLEXIPACK  
SANITARY +  
RADIATORS

# FLEXIPACK ANTIRUTSCH

Not using anti-slip interlayers (AntiRutsch):  
sliding friction coefficient  $< 0,2 \mu\text{D}$

Using AntiRutsch:  
sliding friction coefficient  $> 0,65 \mu\text{D}$

AntiRutsch as a part of all-in-one complete solutions

Both as a pallet overlay and interlayer, Flexipack AntiRutsch ensures optimum securing of both pallet and thus load under maximum tilt angles

## “ANTIRUTSCH” PROVIDES SECURENESS

A sliding load – a nightmare scenario for any haulage contractor. But “AntiRutsch” secures it. “AntiRutsch” provides for hold and stability – whether as an interlayer for internal handling or as an overlay for securing pallets or for classic load securing in line with the 2700 VDI Instruction (Securing road vehicle loads). The low cost one-way alternative to reusable products. Our own test stand vouches for the reliability of “AntiRutsch”. Documented as such on test certificates which we draw up with accredited testing institutes. Our undertaking: with “AntiRutsch” all the goods arrive in top condition.

# FLEXIPACK SECTIONS

Individual solutions for the highest demands placed

The pad always positioned where it is needed

Optimum protection of delicate edges

All-around edge protection for visibly transported products

Sections with cushioning closing systems

# FLEXIPACK STRUCTURED

Our individual packaging solutions meet all customer requirements

Polsterflex flexibility guarantees optimal padding for all delicate goods

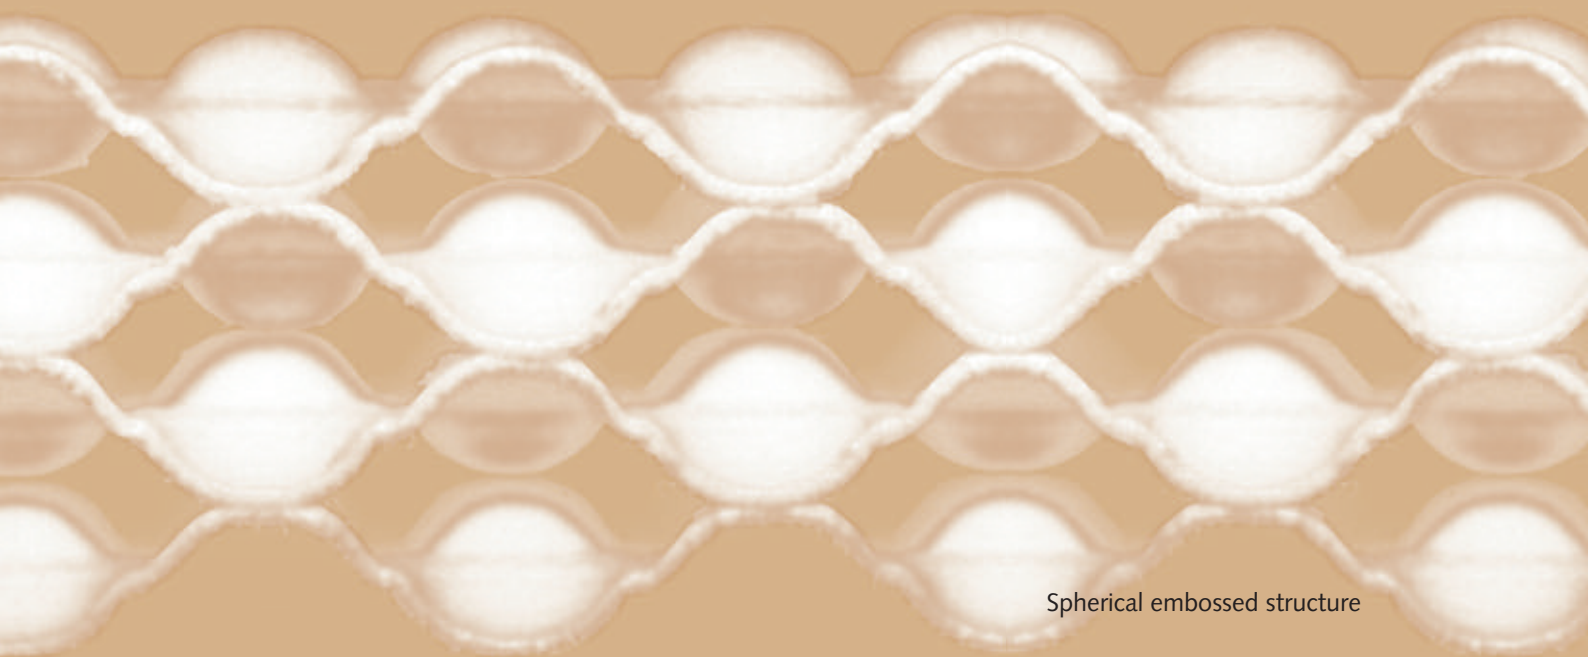

## OUR REAL SENSATION – “POLSTERFLEX” ECONOMICAL TRANSPORTATION PACKAGING

Only the transportation packaging with above-average “PolsterFlex” characteristics will become the classic choice. Thanks to the spherical structure, it is flexible in whatever direction – even diagonally. Double-sided embossing makes for exceptional resilience. Individual in format. Made from the most diverse of materials – from corrugated material and grey cardboard through to non-ferrous metals (max. 0.5 millimetre thickness).

Unlimited range of uses and configurations. Practically every industry benefits from “PolsterFlex”. Make sure you benefit as well!

# FLEXIPACK

## POLSTERFLEX

Spherical embossed structure

Adaptable to all contours and shapes

Extreme flexibility for easy handling linked to considerable scope for laminations

# FLEXIPACK BANDAGE

Decisive optimization to Flexipack's flexibility from additional perforations – can be applied both lengthways and crossways. As an alternative to the classic binding products, Flexipack Bandage provides excellent padded protection for all your delicate goods.

## TURN – WIND – TWIST WRAP AS NEEDED – “FLEXIPACK BANDAGE”

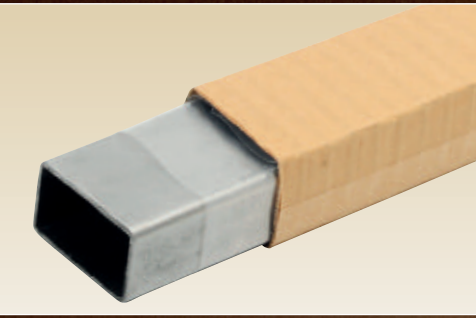

What requires particular protection also deserves special packaging. “Flexipack Bandage” carries true conviction from properties that are more than needed in practice.

“Flexipack Bandage” is easily applicable lengthways or crossways. The right response is “Flexipack Bandage” where “endless” solutions are inquired of. The scope of application is practically unlimited. Ideal for mini-volume production runs, perfect when machinery is used.

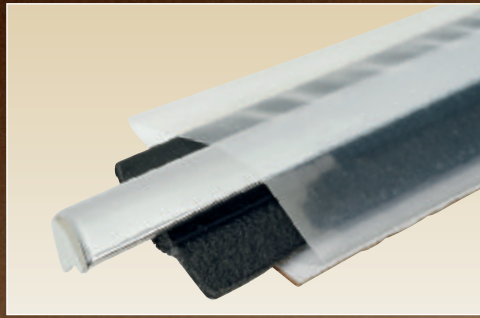

Even the most radical of shapes are optimally protected with Flexipack Bandage.

## FLEXIPACK TUBES BASED ON INDIVIDUAL CUSTOMER REQUIREMENTS

Combination with PE tube film

Multimaterial on Flexipack course

Fitted out with corrosion protection

## FLEXIPACK BAGS, SACKS

Tailored for all customer requirements

Self-adhesive closure flap

Fitted out with corrosion protection
